## Technical Profiles

# Hexion Specialty Chemicals, Inc.

### COMPANY DESCRIPTION

Hexion Specialty Chemicals is the world's leading thermoset resin company, and the leading global supplier of quality raw materials to the graphic arts industry. We provide ink manufacturers with specialty and standard resins, vehicles, wax emulsions, additives and varnishes for sheetfed, offset, flexographic, gravure, lithographic and inkjet printing.

### PRODUCTS' SCOPE

Hexion offers a broad spectrum of resin and specialty chemistries to the graphic arts industry. We are a leading producer of rosin resins, hybrid/ hydrocarbon resins, specialty acrylics, polyester, fumaric and alkyd resins. We combine resin capabilities with our expertise to create innovative vehicles and specialty additives for the web offset and sheetfed markets; our diverse product line enables us to address the current and future challenges facing the publication, commercial and packaging ink markets. We strive to provide more sustainable products through greener chemistry with the highest levels of renewable content available.

### UNIQUE PRODUCTS

- **ECO-REZ™:** Phenol Formaldehyde-Free Rosin Resin platform, providing high renewable content supporting the printing industry with greener chemistry.
- **ECO-SET™:** Sheetfed Varnishes with minimal to zero VOCs formulated with ECO-REZ based resins, entirely Phenol Formaldehyde-Free with high renewable content.
- **ECO-WEB™:** Web offset varnishes formulated with ECO-REZ based resins, entirely Phenol Formaldehyde-Free with high renewable content.

### TECHNICAL MISSION

To be the primary technical resource to our customers by providing timely and unique solutions to ink and vehicle formulators enabling them to keep pace with advancing press technology.

### MAJOR PRODUCT LINES

- **ALLEGRO™** vehicles for ultra quickset, structured resin based sheetfed arnishes.
- **ALPHA-REZ™** functional HC resins for offset inks.
- **CINERGI™** sheetfed vehicles for high performance gels and letdowns.
- **FLEX-REZ™** polyamide resins for packaging.
- **FLUORON™** PTFE dispersions.
- **HYDRO-REZ™** water-borne acrylics and sulfo polyesters.
- **MIRAGLAZE™** high gloss overprint varnishes.
- **OPTILITH™** offset ink additives.
- **POLYSLIP™** solvent based wax dispersions.
- **REACTOL™** solvent based acrylic resins.
- **SETAPRINT™** and **FILTREZ™** rosin based resins for offset and liquid inks.
- **TERLON™**, **SETALIN™** and **TRIONOL™** drying oil alkyds.
- **ULTRAFINE™** PTFE powders.
- **ULTRAPOLY™** wax for commercial offset inks.
- **WEBVAR™** web offset vehicles.

**HEXION™**
